

## **Definition of Ready**

### **DoR for user stories:**

- Well-defined user story
- No previous user story prevents the next user story from being picked up in the next sprint
- User story sized by the delivery team
- Satisfy the minimum viable product
- The team is able to 'demo' the user story
- Improve the usage of the product
- Performance criteria identified

### **DoR for sprints:**

- All user stories meet the Definition of Ready.
- No hidden work
- Prioritized sprint backlog
- Defects, user stories and other work the team has committed to are contained in the sprint backlog
